**협업**

**Junit**

## Which unit testing frameworks do you use?

**Junit5**

**JUnit 5 = JUnit Platform + JUnit Jupiter +  
JUnit Vintage**

**ReRe에서 Junit5 사용**

```
@Test
```

```
void UserTest() {
```

```
    // given
```

```
    User user = new User( loginId: "axm0219", pw: "1q2w3e4r!", nickname: "myeong");
```

```
    User savedUser = userRepository.save(user);
```

```
    // when
```

```
    Optional<User> findUser = userRepository.findByLoginId(user.getLoginId());
```

```
    // then
```

```
    assertThat(findUser.isPresent()).isTrue();
```

```
    assertThat(findUser.get().getLoginId()).isEqualTo(savedUser.getLoginId());
```

```
    assertThat(findUser.get().getPw()).isEqualTo(savedUser.getPw());
```

```
    assertThat(findUser.get().getNickname()).isEqualTo(savedUser.getNickname());
```

```
}
```
